

## PAPUA NEW GUINEA 2018

A lower middle-income country, Papua New Guinea is home to one of the world's most ethnically diverse populations. Most people live in rural areas, often in areas of difficult access. This represents a complex challenge for health care and social services delivery. Fertility rates are high. UNFPA started work in Papua New Guinea in 1996. It helps improve the quality of and access to maternal, newborn, child and adolescent health services, including for sexual and reproductive health. Programmes support in achieving the national development plans, extending measures to prevent and respond to gender-based violence, and collecting and analysing population data for development planning.

### KEY RESULTS ACHIEVED IN 2018

#### CENSUS DISAGGREGATION

Census results disaggregated by age and sex were available and publicly accessible online

#### MIDWIVES IN PUBLIC HEALTH FACILITIES

Newly graduated midwives were deployed in public health facilities with support from UNFPA

#### SEXUAL AND REPRODUCTIVE HEALTH COORDINATION BODY DURING CRISIS

During a humanitarian crisis, a functioning inter-agency sexual and reproductive health coordination body was in place

#### DEMOGRAPHIC AND HEALTH SURVEY
