13. OASIS shall examine and assess the UNFPA governance, risk management and control processes to provide reasonable assurance to the Executive Director, the Oversight Advisory Committee, and the Executive Board that these processes are functioning as intended to ensure the:

The workplan is to be developed based on a prioritization of the audit risk universe, using a risk-based methodology and after consideration of input from senior management, the United Nations Board of Auditors and the Executive Board, as appropriate. The plan should be flexible and adaptable to respond to emerging needs and issues within available resources. Any significant deviation from the formally approved workplan shall be communicated to the Executive Director and the Oversight Advisory Committee through periodic activity reports; and

19. In addition, to strengthen governance, risk management and control processes, the Director of OASIS may submit reports to the Executive Director on cross-cutting or any other significant issues, such as those related to specific functions, processes and programmes, including the potential for improvement thereof.
