United Nations DP/FPA/2013/4

Executive Board of the United Nations Development Programme, the United Nations Population Fund and the United Nations Office for Project Services

Distr.: General 26 April 2013

Original: English

Annual session 2013

3 to 14 June 2013, New York Item 11 of the provisional agenda UNFPA – Funding commitments to UNFPA

UNITED NATIONS POPULATION FUND

REPORT ON CONTRIBUTIONS BY MEMBER STATES AND OTHERS TO UNFPA AND REVENUE PROJECTIONS FOR 2013 AND FUTURE YEARS

Summary

The present report is prepared in response to Executive Board decisions 99/5 and 2000/9, which requested the Executive Director to provide annually updated estimates of regular and co-financing resources. In line with the UNFPA strategic plan, 2008-2013, the purpose of the present report is to promote dialogue between UNFPA and its Executive Board on the overall resource situation of the Fund, while continuing to address the important goal of increasing regular resources and achieving a stable, predictable and diversified resource base.

In 2012, UNFPA contribution revenue for regular and co-financing resources was \$963.2 million, an increase of 8.1 per cent over 2011. The breakdown of this total revenue is \$437.5 million in voluntary contributions to regular resources and \$525.7 million to co-financing resources. Compared with 2011, the decrease in contributions for regular resources in 2012 was \$13.2 million or 2.9 per cent and for co-financing, there was an increase in contributions of \$85.6 million, or 19.5 per cent.

In line with General Assembly resolution 67/226, UNFPA is steadfast in its belief that increasing financial contributions to the United Nations development system, particularly to regular resources, is key to achieving the goals of the International Conference on Population and Development and other internationally agreed development goals, including the Millennium Development Goals; and that contributions to regular resources, because of their untied nature, continue to be the bedrock of the operational activities for development of the United Nations system. Furthermore, as underscored in General Assembly resolution 67/226, and in earlier resolutions, UNFPA recognizes that non-core (co-financing) resources represent an important complement to the Fund's regular resources.

Elements of a decision

The Executive Board may wish to adopt a decision on funding commitments to UNFPA. Elements of a decision are contained in section V of the report.

I. INTRODUCTION

- 1. The present report is prepared in response to Executive Board decisions 99/5 and 2000/9, which requested the Executive Director to provide annually updated estimates of regular and co-financing resources. In line with the UNFPA strategic plan, 2008-2013, the purpose of the present report is to promote dialogue between UNFPA and its Executive Board on the overall resource situation of the Fund, while continuing to address the important goal of increasing regular resources and achieving a stable, predictable and diversified resource base.
- 2. United Nations General Assembly resolution 67/226 and earlier resolutions, including 62/208 and 64/289, underscore, inter alia, that regular resources are the bedrock of the operational activities for development of the United Nations system and that increasing financial contributions to the United Nations development system, particularly to regular resources, is key to achieving internationally agreed development goals. The resolutions also urge countries in a position to do so to substantially increase their voluntary contributions and, if possible, to contribute in the form of multi-year commitments in order to improve the predictability of resources. The resolutions recognize that non-core resources represent an important complement to regular resources. Resolution 67/226 urges Member States making non-core contributions to reduce transaction costs and to streamline reporting requirements, where possible. While UNFPA is grateful for and values the complementarity that non-core resources provide to its work, it continues to advocate for the increase of its regular resources, as they afford neutrality, promote flexibility and enable the organization to respond more effectively to the development needs of countries.
- 3. The present report contains tables on UNFPA regular and co-financing contributions. Additional data is provided in the annexes. The donor revenue figures are inclusive of exchange rate gains and losses. All 2012 financial data used in this report is provisional and 2013 figures are estimates based on information received and commitments and contributions recorded as of 1 February 2013. Some of the figures in the present report may vary from those in the Statistical and financial review, 2012, DP/FPA/2013/3 (Part I)/Add.1, as the present report on contributions (DP/FPA/2013/4) reports annual gross revenues and not refunds from prior years.
- 4. UNFPA is grateful to all Member States for their continued support, including political and financial, despite the continued uncertainty with respect to the global economic situation. Such support is more crucial than ever before as UNFPA continues to be fully engaged in the implementation of the Programme of Action of the International Conference on Population and Development (ICPD), the ICPD beyond 2014 review, and in the consultations and work around the post-2015 development agenda. UNFPA is committed to reducing maternal mortality and to galvanizing world leaders' attention to this issue as reconfirmed in January 2013, at the African Union Summit in Addis Ababa, Ethiopia, where 51 Heads of State and high-level officials from 54 African countries

¹ Through its decision 2009/16, the Executive Board extended the UNFPA strategic plan, 2008-2011, to 2013, including the integrated financial resources framework and the UNFPA global and regional programme.
13-31615

attended a major event on the Campaign for the Accelerated Reduction of Maternal Mortality in Africa (CARMMA), and made new commitments to reduce maternal death and disability in Africa. The event was jointly hosted by the African Union Summit, UNFPA and the African Development Bank.

- 5. In addition, the renewed focus on family planning through commitments made at the London Summit in July 2012, including by several programme countries, and the 2012 launch of the *State of World Population* report focusing on family planning, have helped reposition family planning and reflect the global recognition that it is crucial for sustainable development and also integral to universal access to sexual and reproductive health (SRH) and reproductive rights. With support from Member States and other development partners, UNFPA continues to advocate that universal access to SRH, within a framework of human rights and gender equality, and an understanding of the implications of population dynamics are at the core of sustainable development. The post-2015 global development agenda will only succeed if women, adolescents and youth are placed at the centre.
- 6. While it is commendable that the majority of the 20 top donors of UNFPA either maintained or increased their 2012 regular contributions, it is of concern that six substantially decreased their contributions. However, preliminary indications for 2013 are that at least eight of the key donors might increase their contributions while two may scale back. Other donors have indicated that they will maintain the same level or slightly increase the level of their contributions to regular resources. Based on the most current projections, there will likely be a 7.4 per cent increase in regular contributions for 2013.
- 7. Five multi-year agreements for the period 2008-2011, for regular resources, from five major donors, constituting about 40 per cent of UNFPA projected revenue for 2011, have ended. In 2012, among the top donors, only Luxembourg, Netherlands and Switzerland had made commitments that went beyond 2012. The predictability of resources is essential for ensuring the sustainability of UNFPA programming, and UNFPA calls on its donors to make financial contributions in the form of multi-year commitments, when national legislative and budgetary provisions allow. General Assembly resolution 67/226 also calls on countries "to contribute on a multi-year basis, in a sustained and predictable manner". Multi-year commitments will be particularly important in 2013 as UNFPA develops and finalizes its new strategic plan, 2014-2017.
- 8. In compliance with the International Public Sector Accounting Standards (IPSAS), all contribution revenue is being recorded on an accrual basis. For multi-year agreements for regular resources, the entire amount of the multi-year contribution will not be recorded up front because, while the amount for resources for the first year is firmly determined, the amount for future years is usually indicative and subject to various conditions. UNFPA therefore records the contribution on a yearly basis, upon written confirmation by the donor of the yearly amount or, in the absence of this, on the receipt of cash. On the other hand, UNFPA recognizes the revenue from multi-year co-financing agreements up front regardless of the schedule of payment, unless there are specific reasons to defer revenue

recognition to a later stage. However, programme implementation is linked to the actual receipt of resources in accordance with UNFPA Financial Regulations and Rules.

II. REGULAR AND CO-FINANCING RESOURCES

A. <u>Contribution revenue overview of regular resources</u>

Table 1: UNFPA revenue, 2008-2012, as of 31 December 2012 (in millions of \$)

Error! Not a valid link.

Note: The data for 2008 to 2012 includes contributions only. It does not include data on interest, other income and refunds.

- 9. In 2012, UNFPA contribution revenue for regular and co-financing resources was \$963.2 million (table 1), an increase of 8.1 per cent over 2011. The breakdown of this total revenue is \$437.5 million in voluntary contributions to regular resources and \$525.7 million to co-financing resources. Compared with 2011, the decrease in contributions for regular resources in 2012 was \$13.2 million or 2.9 per cent and for co-financing, there was an increase in contributions of \$85.6 million, or 19.5 per cent.
- 10. UNFPA surpassed the overall target of the strategic plan for 2012 by 16.1 per cent. However, the 2012 contribution of \$437.5 million for regular resources fell short of the target of \$500 million by 12.5 per cent or \$62.5 million, while for co-financing the target was surpassed by 59.3 per cent, or \$195.7 million, with the receipt of \$525.7 million against a target of \$330 million.
- 11. For 2013, the strategic plan targets are \$520.0 million for regular resources and \$350.0 million for co-financing. Based on preliminary projections and using the January 2013 United Nations official exchange rates, UNFPA estimates that its 2013 contribution revenue will be \$470.0 million for regular resources and \$516.0 million for co-financing. These projections will continue to be reviewed on a monthly basis and depend on a number of factors, including exchange rate fluctuations.
- 12. The estimated 2013 projected revenue for regular contributions of \$470.0 million represents an increase of \$32.5 million from the 2012 level of \$437.5 million. According to recent data, increases in regular contributions for 2013 from the 2012 level have been announced by five of the top donors of the Fund. UNFPA will continue to advocate for the increase in contributions with members of the Organisation for Economic Co-operation and Development (OECD)/Development Assistance Committee (DAC), and non-DAC members, including programme countries. In mobilizing resources for its programmes, UNFPA will also continue to broaden and diversify its donor base, including reaching out to the private sector and foundations.
- 13. The revenue overview in table 1 is supplemented by annex 1, which provides detailed information on UNFPA 2012 provisional revenue as of 31 December 2012, actual commitments and the best estimates of contributions to UNFPA regular resources with data that was available as of 1 January 2013. These contribution commitments include the

following: (a) commitments for 2013 only and multi-year commitments for 2013 and future years; (b) commitments for 2013 received during the United Nations pledging conference held on 13 November 2012 in New York; and (c) letters received and verbal indications from governments confirming support to UNFPA for the period 2013 and onwards.

- 14. The total number of donor Governments in 2012 was 148, of which 106 contributed to regular resources only, seven contributed to co-financing resources only and 35 contributed to both regular and co-financing resources. Nine countries belonging to OECD/DAC, and 41 programme countries increased their contributions to regular resources; and 10 countries belonging to OECD/DAC and 10 programme countries increased their contributions to co-financing resources. As of 1 January 2013, UNFPA had received 52 official commitments for 2013, of which 21 were multi-year commitments, as listed in annex 2.
- 15. In 2012, Sweden, Norway, Netherlands, Denmark, Finland, United Kingdom of Great Britain and Northern Ireland, United States of America, Japan, Germany, and Canada were the Fund's 10 largest donors in US dollar terms to regular resources. Major donors that have increased their contributions, in the currency used for the contribution, are listed in table 2.

Table 2: Increases in contributions of major donors to UNFPA regular resources (2011-2012) as of 31 December 2012 (in millions)

Major Donors	Currency	2011	2012	Increases
	Used			in %
Australia	AUD	10.5	14.0	33.3
Belgium	EUR	5.5	5.7	3.6
Denmark	DKK	205.7	250.0	21.5
Finland	EUR	28.5	29.0	1.8
Germany	EUR	15.6	16.0	2.6
Ireland	EUR	3.0	3.1	3.3
New Zealand	USD	4.6	5.0	8.7

- 16. Further details on contributions from the Fund's top 10 donors to regular resources for the past six years are provided in annex 3.
- 17. Projections for 2013 regular contributions revenue include indications from the following major donors that have increased or will increase their respective contributions in 2013: Finland, Germany, Norway, Sweden and Switzerland. Of particular concern is the current volatility of exchange rates, which may result in a decrease in the US dollar equivalent for contributions which have not yet been received. Table 3 lists the projected increases in national currency terms in 2013 compared with the 2012 contribution levels.

Table 3: Projected increases in local currency contributions of major donors to UNFPA regular resources (2012-2013) as of 1 January 2013 (in millions)

Error! Not a valid link.

B. Overview of co-financing contributions

- 18. The year 2012 was marked by a significant increase of co-financing revenue (represented by the amounts committed through new agreements concluded during the year). Such contributions increased from \$440.1 in 2011 to \$525.7 million in 2012, namely, an increase by 19.5 per cent (see table 4 for more details). The growth of extrabudgetary funding and of the number of associated projects carries a risk of increased transaction costs. While the co-financing contributions were complementary to regular resources contributions, it should be noted that about one third of co-financing agreements signed between 2011 and 2012 related to contributions of a value below \$150,000. The number of agreements and the average dollar amount carry a risk of higher transaction costs and fragmentation of management and reporting. It should be underscored that General Assembly resolution 67/226 "urges Member States making non-core contributions to reduce transaction costs and to streamline reporting requirements, where possible".
- 19. While in the last few years, UNFPA continued to receive a higher share of its revenue from contributions to regular resources, in 2012, for the first time in the Fund's history, UNFPA received a higher proportion of co-financing contributions of total (regular and co-financing resources contributions) revenue: 42 per cent in 2010, 49 per cent in 2011 and 55 per cent in 2012.

Table 4: Contributions to UNFPA co-financing resources (2011-2012)
(in millions of \$)

Donors	2011	Donors	2012
United Kingdom of Great Britain	135.2	United Kingdom of Great Britain	151.6
and Northern Ireland (the)		and Northern Ireland (the)	
United Nations inter-organizational	107.0	Netherlands (the)	105.5
transfers*		United Nations inter-organizational	87.8
European Commission	40.5	transfers*	
Netherlands (the)	38.0	European Commission	35.1
Australia	25.8	Canada	19.5
Denmark	19.6	Sweden	19.4
Sweden	10.9	Japan	12.5
France	7.7	Germany	11.3
Luxembourg	6.1	Luxembourg	9.8
Others	49.3	Others	73.2
Total	440.1	Total	525.7

^{*}Includes all funds received from joint funding mechanisms (joint programmes and multi-donor trust fund) as well as bilateral transfers from United Nations agencies.

- 20. Co-financing contributions have been in support of thematic trust funds and several other programmes and projects in both the development and humanitarian fields. Notable increases from the 2011 level occurred in the thematic trust fund for reproductive health commodity security (RHCS) and in bilateral transfers. In the future, UNFPA foresees additional co-financing contributions from donor governments that will play a critically important role in supporting global initiatives and inter-agency partnerships advancing maternal health and family planning.
- 21. UNFPA has been working in close consultation with UNICEF and UNDP in the preparation of the integrated budget and in the review of the impact of cost definitions and classification of activities on harmonized cost-recovery rates (DP-FPA/2012/1). These have resulted in the adoption of a new methodology and related cost-recovery rates that will come into effect from January 2014 based on Executive Board decisions. The impact of the new cost-recovery rates will be gradual since the cost-recovery rate for agreements signed prior to entry into force will remain at the current level.

Co-financing contributions from United Nations inter-organizational transfers

22. Out of the total co-financing contribution revenue of \$525.7 million in 2012 (table 4), a total of \$87.8 million was United Nations inter-organizational transfers compared with \$107.0 million in 2011. The 2012 amount includes: \$41.0 million received from the UNDP Multi-Partner Trust Fund Office; \$11.5 million from the United Nations Central

Emergency Response Fund (CERF); \$10.6 from UNICEF, \$1.8 million from the United Nations Human Security Trust Fund established by Japan; and \$21.6 million for participation in joint programmes where agencies other than UNDP are acting as Administrative Agent and UNFPA was a participating United Nations organization. Annex 5 contains information on donor contributions received in 2012 by UNFPA in its capacity as Administrative Agent for joint United Nations programmes. UNFPA records as revenue only the portion of these contributions that were distributed to UNFPA for implementation (reflected under inter-organizational transfer in table 4).

Co-financing contributions from programme country Governments

23. Co-financing from programme country Governments in support of their own country programmes continued to form a solid part of the total revenue. In 2012, agreements amounting to \$22.1 million were signed compared with \$18.6 million in 2011, representing an increase of \$3.5 million (18.8 per cent). In 2012, the five largest commitments were from Colombia, \$6.1 million; Sierra Leone, \$3.7 million; Venezuela (Bolivarian Republic of), \$3.2 million; Nigeria, \$3.2 million; and Guatemala, \$1.6 million. In 2012, commitments were also made by Belize, Bolivia (Plurinational State of), Botswana, Brazil, Cameroon, Gabon, Georgia, Lebanon and Uruguay. Details on the contributions are presented in annex 4 of this report. Although the preferred funding modality is regular resources, UNFPA calls on Governments to also increase their cofinancing contributions as an important supplement to the regular resource base.

European Commission

24. In 2012, co-financing contribution revenue from the European Commission totalled \$35.1 million. New contribution agreements were signed with the European Commission in support of: census projects in Guinea, Mauritania, Niger and Zimbabwe; a health facility assessment and a project to revitalize maternity waiting homes in Zimbabwe; a gender project in Malawi; a maternal, neonatal and child health project in the Philippines; and a project to support the response to gender-based violence among Syrian refugees in Jordan.

C. Thematic funding

25. Thematic trust funds are internally pooled donor funds aimed at supporting the achievement of results in the framework of the UNFPA strategic plan. They support the approved programmes in the focus areas of the Fund's work in priority countries with special needs and reinforce a coherent approach to align with national plans and budgets. The predictability of resources in the thematic funds creates a unique opportunity to scale up programming to help meet unmet needs. Thus far, UNFPA has established three thematic funds for: (a) RHCS; (b) maternal health; and (c) obstetric fistula. It is currently engaged in discussions with several Member States on the future of these funds as part of the consultations on the development of the 2014-2017 strategic plan.

Thematic fund for reproductive health commodity security

Table 5: Co-financing contribution revenue for the thematic fund for reproductive health commodity security (2011-2012) as of 31 December 2012 (in millions of \$)

Donors	2011	Donors	2012
United Kingdom of Great Britain and Northern Ireland (the)	96.1	United Kingdom of Great Britain and Northern Ireland (the)	107.2
Netherlands (the)	33.8	Netherlands (the)	92.6
European Commission	25.1	European Commission	10.2
Australia	11.0	Luxembourg	1.0
Denmark	9.0	Liechtenstein	0.03
Luxembourg	0.6	Private	0.004
Private	0.01		
Total	175.6	Total	211.1

- 26. The Global Programme to Enhance Reproductive Health Commodity Security (GPRHCS) will conclude its phase 1 at the end of 2013. At the annual GPRHCS meeting in April 2012, donors pledged support to start a new phase of the programme building on achievements and lessons learned. Unmet need for family planning is an issue high on the global agenda as the UNFPA flagship thematic fund for family planning prepares to enter its second five-year phase in 2014.
- 27. In 2012, the thematic fund supported 46 countries. The interventions focused on the challenges of achieving reproductive health commodity supply security through the provision of reproductive health supplies; building capacity for computerized national systems for tracking stocks of supplies; training for logistics managers and community-based distribution agents; training for health workers in modern methods of family planning, such as long-acting implants; and advocacy to strengthen national planning, and political and financial commitments. The programme facilitated the mainstreaming of RHCS into national health systems, budgets and plans, with a commitment to aid effectiveness and national ownership.
- 28. The GPRHCS has made an important contribution to national efforts to help meet the international community's commitment to ensure universal access to reproductive health care by 2015 and to contribute to the achievement of the health-related Millennium Development Goals (MDGs) 4, 5 and 6. However, even with the generous support from the partners, the needs in this area, particularly in relation to the increasing SRH needs of adolescents and youth, continue to outstrip the funds available. For the next phase, at the centre of the proposed programme is the monitoring and evaluation framework. The top-level goal is to contribute to universal access to reproductive health commodities and family planning services and information within the context of SRH and reproductive rights by 2020 for improved quality of life. Contributing to this goal will be one key

outcome: increased availability and utilization of reproductive health commodities and family planning services and information.

29. The GPRHCS mobilized \$600 million from 2007 to 2012 and contributed to measurable progress towards ensuring a secure and reliable supply of contraceptives, condoms, life-saving maternal health medicines and other essential supplies in developing countries, utilizing strategic approaches with significant multi-year support. Total contributions revenue mobilized in 2011 and 2012 amounted to \$175.6 million and \$211.1 million respectively, as shown in table 5. In 2012, funds were committed by a number of partners, including the European Commission, Liechtenstein, Netherlands and the United Kingdom of Great Britain and Northern Ireland. For 2013, Denmark, European Commission, Luxembourg, Netherlands and Spain (Catalonia) have pledged over \$70 million.

Maternal Health Thematic Fund

Table 6: Co-financing contribution revenue for the Maternal Health Thematic Fund, 2011-2012 as of 31 December 2012 (in millions of \$)

Error! Not a valid link.

- 30. UNFPA has placed MDG 5 at the centre of its core business as also reflected in the midterm review of the strategic plan (see DP/FPA/2011/11). The Maternal Health Thematic Fund (MHTF), which became operational in 2008, aims to scale up UNFPA and development partners' support to achieve MDG 5 on improving maternal health. The MHTF focuses on three areas of intervention: emergency obstetric and newborn care; human resources for health, particularly through the midwifery programme; and the prevention and treatment of obstetric fistula (the latter is also supported through a discrete fund). The MHTF supports countries in tracking results and in improving the identification of maternal deaths and fostering a proactive response to avert future deaths.
- 31. The MHTF contributes to the large joint effort by the United Nations Secretary-General's Global Strategy for Women's and Children's Health and the Health 4+ (H4+) partnership (UNFPA, UNICEF, WHO, World Bank, UNAIDS and UN-Women) to accelerate progress towards MDGs 4, 5 and 6 and CARMMA. Since 2008, the MHTF has scaled up support to 31 priority countries for maternal health, including for midwifery, and to 43 countries for the Campaign to End Fistula.
- 32. Under UNFPA leadership and following the launch of the first-ever *State of the World's Midwifery* report in 2011, global standards for midwifery education and regulation have been published and disseminated, and countries are being supported technically to implement the recommendations. The midwifery programme is now under way in 33 countries to strengthen and scale up the midwifery workforce.
- 33. With its Health 4+ partners, UNFPA has jointly conducted technical missions in priority countries such as Afghanistan, Bangladesh, Democratic Republic of the Congo,

Ethiopia and the United Republic of Tanzania. Under UNFPA leadership, global interagency implementation guidance will be developed jointly with partners.

- 34. The recent external evaluation of UNFPA support to maternal health and of the MHTF has shown that the MHTF is contributing to an enhanced response by UNFPA in supporting countries' progress towards MDG 5 to improve maternal health. The management response to the evaluation has been prepared and UNFPA is addressing the recommendations to improve the Fund's support to maternal health.
- 35. Co-financing contribution revenue for the MHTF amounted to \$11.1 million in 2011 and \$16.8 million in 2012 (see table 6).

Thematic fund for obstetric fistula and the Campaign to End Fistula

Table 7: Co-financing contributions revenue for the Campaign to End Fistula (2011-2012) as of 31 December 2012 (in millions of \$)

Total	1.5	Total	2.6

- 36. Over the years, the Campaign to End Fistula has grown significantly in coverage, from 12 countries to more than 50 countries in sub-Saharan Africa, Asia, Latin America and the Caribbean and the Arab States regions. The Campaign now includes more than 80 partner agencies. UNFPA has directly supported more than 27,000 women and girls to receive surgical fistula repairs. During 2012, UNFPA continued to work with two Campaign partners, Direct Relief International and the Fistula Foundation, to further expand the global fistula care map.
- 37. To strengthen fistula programming, in 2012, UNFPA continued the drive to reinforce human resources and expertise for fistula within the organization, with new positions dedicated to fistula at headquarters and in the subregional offices in Africa, as well as in more than 10 fistula-affected countries across the globe.

38. Since 2009, the operations of the fistula fund have been programmatically aligned with the MHTF to reduce transaction costs and increase sustainability. Fistula programming is fully integrated into MHTF activities, while leaving the option open to donors for separate funding for the Campaign to End Fistula. In 2012, the contribution revenue to the Campaign to End Fistula was \$2.6 million in direct contributions from a number of partners listed in table 7. This is an increase from \$1.5 million in co-financing contributions in 2011.

D. <u>Contributions to UNFPA for emergency preparedness and humanitarian response</u>

- 39. In 2012, the second generation humanitarian response strategy and its two implementation instruments, namely, the standard operating procedures in humanitarian settings and the fast track procedures, were endorsed by the UNFPA Executive Committee and rolled out to the country offices. Co-financing resources represented a vital support in the implementation of the strategy with increased UNFPA emphasis on mainstreaming humanitarian response and preparedness; and systems optimization (human resources, finance, procurement and programme management). In 2012, 33 countries and territories benefited from co-financing contributions that amounted to approximately \$25.8 million.
- 40. The United Nations joint humanitarian funding modalities, CERF, common humanitarian funds (CHF) and United Nations Action Against Sexual Violence in Conflict (UN Action), remained the Fund's principal humanitarian donors with a total funding of \$17.3 million (\$11.5 million from CERF, \$5.1 million from CHF and \$0.7 million from UN Action), constituting two thirds of total humanitarian funding to UNFPA. Other top humanitarian donors were the United States of America at \$3.6 million; Denmark at \$2.6 million; and Japan at \$0.5 million.
- 41. Funding to UNFPA humanitarian programmes through co-financing decreased from \$46.5 million in 2010, to \$40.4 million in 2011 and \$25.8 million in 2012, i.e., a 45 per cent decrease. The decrease has been primarily due to the global financial downturn and increased UNFPA emphasis on high-quality and focused humanitarian programming within a few countries, for example, the number of countries receiving co-financing decreased from 42 in 2011 to 33 in 2012.
- 42. The 2012 humanitarian contributions enabled UNFPA to implement 70 life-saving programmes. Key UNFPA humanitarian interventions in 2012 were mainly in relation to the Syrian and Sahel humanitarian crises. UNFPA was also actively engaged in responding to natural disasters such as the Typhoon Bopha in the Philippines and the earthquake in Guatemala. Unlike previous years, in which the bulk of humanitarian funding went towards crises in the Africa region, in 2012, the Arab States region received the highest co-financing funding at approximately \$11.4 million, with the Africa region receiving the second highest amount, namely, \$8.7 million.

E. Contributions from the private sector

- 43. The total amount of revenue (or value of new agreements signed) from the private sector during 2012 was \$10.6 million compared with \$6.5 million in 2011. This represents a 63 per cent increase over 2011. Of the actual funding received, 29 per cent came from corporations or corporate foundations; and 50 per cent from other foundations. The remaining funds were a mix of individual and corporate donations received through Americans for UNFPA (now called Friends of UNFPA) as well as contributions from nongovernmental organizations/academia.
- 44. Although the overall picture of private-sector fundraising is good, the relatively high transaction costs of developing and maintaining partnerships with the private sector pose a challenge. The existing portfolio demonstrates a number of repeat donors, but attracting new donors requires a high degree of staff interaction and more in-depth consideration of risks associated with reputation and conflict of interest, creating higher transaction costs and a longer partnership design period. In addition, the private sector has a preference for earmarked support, as demonstrated by the fact that all funds received were intended for specific country projects. UNFPA has committed to manage these co-financing programmes and to supply financial and programmatic reports honouring existing agreements, in some cases until 2016. This commitment may limit the Fund's ability to take on new partnerships in 2013 and 2014 unless new resources are provided or the trend for earmarked co-financing projects is reversed. The increased flexibility of the private sector suggests that a more open dialogue on critical outcomes and the provision of nonfinancial incentives for contributions to core/thematic funds could shift this dynamic. This approach is worth exploring to prevent a saturation point of staff time and resources per contribution.
- 45. The financial figures above demonstrate an optimistic future for private-sector fundraising but it should be recognized that, while this is a growth area, the greater value of private-sector contribution to UNFPA may lie in non-monetary partnerships. Private-sector financial contributions alone may never supersede those of traditional public-sector donors. For UNFPA it has been extremely important to have the resources and flexibility to explore monetary and non-monetary partnerships. Non-monetary private-sector partnerships take longer to design but can be pivotal programmatic turning points, scaling up access to services, creating demand and integrating technology and innovation that allow public-sector fundraising to achieve a much greater impact.
- 46. UNFPA continues to work with United Nations organizations to scale up and integrate the engagement of the private sector in achieving development goals. A critical factor will be whether the United Nations includes the voice of the private sector in the development of the post-2015 agenda, a request that was underlined by private-sector companies in September 2012 during the United Nations General Assembly. The number of private-sector companies wishing to be involved and make individual commitments towards new development goals is very encouraging but it remains to be seen whether the United Nations has the scope, resources and flexibility to utilize this enthusiasm. UNFPA continues to work closely with the United Nations Global Compact Office as a critical forum in sourcing and maintaining the interest of the private sector in the work of the United Nations.

III. EFFORTS TO FURTHER DIVERSIFY THE FUNDING BASE

- 47. While UNFPA continues to enjoy support from a significant number of Member States, it needs to broaden the political and financial support for its mandate, especially at this crucial time of the review of the ICPD, the dialogue around the post-2015 development agenda and the development of the new UNFPA strategic plan, 2014-2017. A major corporate priority for UNFPA is the goal of diversifying its sources of funding so as to increasingly include emerging economies, programme countries, private and philanthropic sectors and other funding sources in addition to traditional official development assistance (ODA) partners.
- 48. In order to expand its funding base, in a phased approach, UNFPA has developed specific strategies for accelerated resource mobilization partnerships with a number of Member States, in all regions, with immediate, medium- and long-term growth potential. While an increase of core contributions always remains the main priority for UNFPA, contributions from countries to their own country programmes and private-sector partnerships are key elements of the accelerated partnerships. The first phase has already demonstrated the potential stemming from this intensified effort.
- 49. Depending on definitions, middle-income countries and emerging donors currently represent around 50 per cent of the global gross domestic product (in purchasing power parity terms), and this share is growing. Currently, this situation is not reflected in the composition of the UNFPA funding base and, therefore, stronger partnerships with middle-income countries continue to be imperative for regular resources but also for support to specific programmes at the country level.
- 50. UNFPA efforts at all levels global, regional and country-specific and the significant efforts of the Executive Director and senior management in 2012 to mobilize political and funding support for corporate priorities, through numerous missions to both programme and donor countries, have yielded positive results. A decision to appoint new resource mobilization advisers in each regional office will provide crucial support for country offices in all regions. Further growth is thus expected over both the short- and medium-term. However, continued engagement is required to maintain and increase a diversified level of contributions. UNFPA wishes to acknowledge the contributions of several programme countries to their own country programmes which continued to increase in 2012 from the 2011 level as reported in annex 4 of this report; and the continued efforts to increase contributions to regular resources. During the CARMMA special event in January 2013, for example, the Government of Gabon made a commitment to significantly increase its contribution to UNFPA regular resources in 2013, joining the group of non-OECD/DAC Member States contributing \$0.5 million or more (see annex 1 for further details). This contribution has been received in the UNFPA account.
- 51. UNFPA is grateful for this important decision by the Government of Gabon, which is setting a positive example for other countries in similar situations. There are ongoing efforts and continued engagement with other countries, and it is hoped that they will be

encouraged to match or surpass this contribution. UNFPA hopes to continue working with these potential "development champions" in recognition of their important contribution to the work of the Fund.

52. Throughout 2013, UNFPA will continue to engage with Member States and other partners in the development of the new 2014-2017 strategic plan, which will include an integrated resources framework based on commitments and indications expressed by Member States and other partners.

IV. CONCLUSION

- 53. General Assembly resolution 67/226 and other pertinent earlier resolutions emphasize that increasing financial contributions to the United Nations development system, particularly to regular resources, is key to achieving internationally agreed development goals, including the MDGs, and that contributions to regular resources, because of their untied nature, continue to be the bedrock of the operational activities for development of the United Nations system. While the proportion of regular contributions to total contributions (regular and co-financing contributions) has remained relatively healthy in UNFPA in recent years, for the first time in the Fund's history the trend was reversed in 2012, with total contributions consisting of 45 per cent of regular contributions and 55 per cent of co-financing contributions. Preliminary indications suggest that the trend towards more earmarked contributions is continuing. While the Fund acknowledges that earmarked contributions complement unearmarked contributions and represent an important additional support for the UNFPA mandate, they are not a substitute for regular resources. It should be noted that, out of 148 donor Governments that contributed financial resources to UNFPA in 2012, seven did not contribute to regular resources.
- 54. Co-financing contribution revenue increased from \$440.1 in 2011 to \$525.7 million in 2012. As noted earlier, the growth of extrabudgetary funding and of the number of associated projects carries a risk of increased transaction costs. UNFPA is mindful of this and seeks to maintain an even balance between regular and co-financing resources. It should also be noted that about one third of new co-financing agreements signed in 2011 and 2012 are for contributions amounting to less than \$150,000, thus resulting in fragmentation, raising concerns about proliferation of reporting requirements and flexibility in the strategic use of resources.
- 55. The prevailing global economic and social climate has direct implications for the attainment of the ICPD goals and the MDGs, as well as for UNFPA-supported programmes. Development needs remain significant and it is becoming clear that realizing MDG 5 (reducing the maternal mortality ratio by three quarters, and achieving universal access to reproductive health care) appears to be in jeopardy. The slow progress in achieving this goal underscores the need for increased political commitment and greater investments in health systems, in particular, investments in reproductive health services, and in addressing the unmet needs of the world's most impoverished and marginalized populations: women and the largest generation of adolescents and young people. In this

regard, the support of the Executive Board and the Member States through increased contributions to UNFPA is needed now more than ever.

- 56. While acknowledging the current fiscal environment, UNFPA hopes that countries in a position to do so will maintain and, if possible, increase their voluntary contributions on a multi-year basis, giving priority to regular resources. This will be particularly important for the predictability of the funding as UNFPA embarks on a new strategic plan cycle for 2014-2017 and the integrated budget, 2014-2017, under the guidance and commitment of the Executive Board and the Member States. Increased resources will allow UNFPA to enhance support to countries to advance the ICPD goals beyond the 2014 review and the post-2015 sustainable development framework. It is in this spirit that UNFPA appeals to the Executive Board and Member States to translate their commitment to achieving these goals into multi-year commitments to the Fund. Multi-year commitments are critically important to be able to develop a realistic four-year budget (2014-2017).
- 57. UNFPA sincerely appreciates co-financing contributions. However, only a sufficient and consistent flow of regular resources that are not tied to specific purposes will allow the Fund to meet countries' long-term needs, provide confidence in flexibility and planning, and ensure accountability.
- 58. UNFPA values its close collaboration with the Executive Board and all Member States and appreciates their commitment, continued cooperation and unwavering support. It is in this spirit that UNFPA appeals to the Fund's donor family to support the multi-year funding format as urged in General Assembly resolution 67/226, and earlier resolutions, and as supported in numerous Executive Board decisions. Such support is critical in ensuring predictable and sustainable funding to enable UNFPA to plan and deliver its multi-year programmes in support of countries. It is notable that 41 countries submitted multi-year commitments in 2012 although only three of these are among the UNFPA top donors. A predictable cash flow is important for the effective and efficient management of UNFPA operations. It is in this context that UNFPA encourages all Governments, particularly the major donors, regarding the timely submission of their contribution commitments and payment schedules.
- 59. UNFPA recognizes the importance of widening its political support and financial base. The Fund is actively strengthening its strategic partnerships with middle-income countries and engaging with emerging economies, and it has developed a comprehensive private-sector engagement strategy. UNFPA strategic efforts to accelerate resource mobilization partnerships with Member States in all regions have already yielded results in 2012. At all levels, UNFPA is working closely with programme countries to ensure that they continue to make voluntary contributions to the Fund and further increase co-financing contributions, including to their own country programmes. Economic growth and increasing political support for the ICPD Programme of Action and the post-2015 development agenda present significant opportunities for UNFPA to expand strategic partnerships and resource mobilization in these countries.

V. ELEMENTS OF A DECISION

60. The Executive Board may wish to:

- (a) Take note of the report on contributions by Member States and others to UNFPA and revenue projections for 2013 and future years (DP/FPA/2013/4);
- (b) Commend the efforts being made by UNFPA to broaden the funding base and mobilize additional resources and other forms of support from diversified sources, including from the private sector;
- (c) Emphasize that regular resources are the bedrock of UNFPA and essential to maintaining the multilateral, neutral and universal nature of its work, and encourage UNFPA to further mobilize these resources while also continuing to mobilize supplementary resources for its thematic funds and programmes;
- (d) Encourage all Member States to increase their core contributions and also encourage countries that are in a position to do so to make contributions by the first half of the year and to make multi-year pledges in order to ensure effective programming;
- (e) *Encourage* all programme country Governments to expand contributions to programmes in their own countries;
- (f) *Encourage* all Member States to increase support for Millennium Development Goals 3, 4, 5 and 6 in order to accelerate results and enable the attainment of the targets by 2015;
- (g) *Emphasize* that UNFPA needs strong political and increased financial support as well as predictable core funding in order to enhance its assistance to countries to fully integrate the agenda of the International Conference on Population and Development into national development strategies and frameworks and achieve the internationally agreed development goals.

Annex 1: UNFPA contribution revenue to regular resources for 2011 and 2012 and estimates for 2013 (by major donors and geographical region) as of 1 January 2013
