

Presentation of UNFPA Country Programmes Eastern Europe and Central Asia Region Executive Board Informal Consultations, August 2020

Alanna Armitage

Regional Director
UNFPA Eastern Europe and Central Asia

Regional context

- COVID-19 pandemic risks reversing progress made
- Rapid demographic change (low fertility, ageing, outmigration, population shrinking)
- Very low modern contraceptive use in parts of the region
- New infections of HIV have increased by 72% since 2010
- Social norms are shifting but remain barrier for gender equality
- Persistent high rates of Gender-based violence and harmful practices (child marriage, son preference)

Belarus

Gender equality and women's empowerment

Domestic violence legislation in line with int'l standards adopted

10% decrease in prevalence of physical & psychological violence against women and girls

Gender sensitive family-friendly model incorporated in National Plan on Gender Equality (2021-2025) and used by companies

Sexual and reproductive health

At least 25% of young people use healthy lifestyles platform
