

Stockholm Statement of Commitment

On the Implementation of ICPD Beyond 2014

1. We as parliamentarians from all regions of the world gathered in Stockholm, Sweden, from 23-25 April 2014, to set a course of action for the implementation of the Programme of Action of the International Conference on Population and Development (ICPD) beyond 2014,
2. We meet at a time when the General Assembly of the United Nations, through its resolution 65/234, has extended the 20 year Programme of Action beyond 2014 and completed a review of the implementation of the Programme of Action “on the basis of the highest-quality data and analysis of the state of population and development”, “taking into account the need for a systematic, comprehensive and integrated approach to population and development issues”; the need to respond to “new challenges relevant to population and development and to the changing development environment”, and to reinforce “the integration of the population and development agenda in global processes related to development”,
3. We recognize the need for the full implementation of the Programme of Action and the key actions for its further implementation and acknowledge the findings and recommendations of the review, including from the global thematic meetings on youth, human rights and women’s health, as well as the outcomes of the regional reviews, which constitute plans of action for the respective regions,
4. We stress the importance of further the implementation of the ICPD Programme of Action Beyond 2014 on the basis of the findings and recommendations of the review, including the outcomes of the regional reviews,
5. We take note of the forthcoming special session of the General Assembly on the follow-up to the Programme of Action of the International Conference on Population and Development beyond 2014, to take place on 22 September, 2014, and commit to work with our governments to ensure that the outcome of ICPD Beyond 2014 Review constitutes the basis for further implementation of the ICPD and to integrate it in the Post 2015 development agenda,
6. We recall and commend the positive contribution of parliamentarians towards the achievement of the goals and objectives of the ICPD, including the work done by previous Parliamentary Conferences on implementation of the International Conference on Population and Development Programme of Action held in 2002 Ottawa, 2004 Strasbourg, 2006 Bangkok, 2009 Addis Ababa and 2012 Istanbul,
7. We note that while progress has been made by our countries towards the achievement of the goals and objectives of the ICPD, challenges remain to fully implement the

Programme of Action and achieve the Millennium Development Goals, in particular MDG 5 b) on universal access to sexual and reproductive health,

8. We also note that achieving inclusive economic and social development requires appropriate legislation, national policies and programmes that guarantee and promote human rights, dignity and equality for all,
9. We are concerned that despite the gains made in the past 20 years, these gains have not been experienced equally by all, and that a considerable number of people continue to live in conditions of extreme poverty, without the fulfillment of their human rights and fundamental freedoms,
10. We note that despite the vast possibilities created by digital communication tools, a great number of people lack access to these tools hindering their ability to benefit from the new economy,
11. We recognize the critical inter-linkages between population and sustained economic growth and sustainable development and their central importance to addressing development challenges and priorities particularly in improving the quality of life of all people without distinction of any kind,
12. We also recognize the importance of the above inter linkages in eradicating poverty and social inequities; achieving universal access to quality primary and secondary education; achieving gender equality; achieving universal health coverage; improving maternal and child health; expanding high quality family planning services, and access to a mix of modern contraceptive methods which take into account client choices and clinical needs; promoting sexual and reproductive health and rights; preventing and treating sexually transmitted infections, including HIV/AIDS; and eliminating gender based violence as well as harmful practices against women and girls; and addressing the health and other impacts of alcohol and drugs abuse,
13. We recognize the opportunity to shape the new international development agenda that will succeed the Millennium Development Goals by ensuring that the vision, principles, objectives and goals of the ICPD Programme of Action and the priorities emanating from the review of its implementation are reflected in the ongoing post MDG and Sustainable Development Goals discussions and integrated in the post 2015 development agenda,
14. To this end, we commit to mobilize our constituencies and governments to support a human-rights based post 2015 development paradigm that ensures gender equality, women and adolescent's sexual and reproductive health and rights, and comprehensive development for youth;

15. We call for targets and indicators on sexual and reproductive health and rights to be included in the standalone goals on gender equality and the empowerment of women and girls; universal health goal including for universal health coverage, and on the rights of young people, including investing in their quality education, decent employment opportunities and effective livelihood skills, as part of the post 2015 development agenda.

16. We further call for the integration of population dynamics in all development planning at national and subnational levels as a critical foundation for sustainable development, taking into account the need for a life cycle approach from birth to ageing, to ensure lifelong capabilities and resilience;
