HIV and COVID-19

The impact of six months of varying levels of treatment interruption on AIDS-related deaths, sub-Saharan Africa, 2020–2021

Overview of HIV and COVID-19 work

1. Preventing interruption of HIV services

2. Addressing inequalities

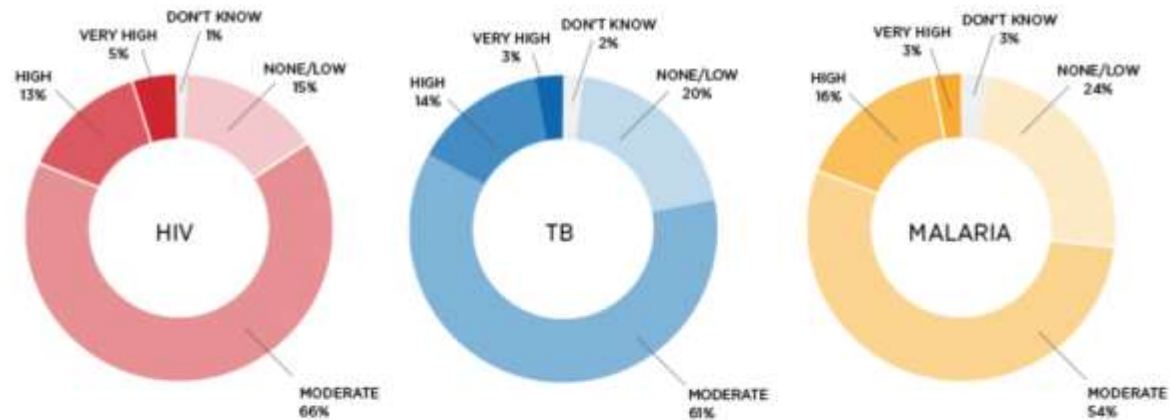

3. Strengthening community responses

4. Reversing the broader development impact

1. Preventing interruption of HIV services

- 85% of HIV programs reported disruption to service delivery (18% with high or very high disruptions);
- 78% of TB programs reported disruption to service delivery (17% with high or very high disruptions);
- 73% of malaria programs reported disruption to service delivery (19% with high or very high disruptions).

Disruption in health service delivery
