During COVID-19, persons with disabilities face more discrimination, violence, and barriers to accessing information, education and services related to gender-based violence and sexual and reproductive health.

WOMEN AND GIRLS WITH DISABILITIES ARE AT HIGHER RISK

1 IN 7 PEOPLE IS A PERSON WITH DISABILITY

COVID-19 response must engage organizations of persons with disabilities (OPDs) and networks in decision making.

During COVID-19, GBV among women and girls with disabilities increases due to social isolation, disrupted routines and if caregivers can’t reach them.

x3

Persons with disabilities are 3 times more likely to experience different forms of violence than persons without disabilities.

To prevent GBV during COVID-19, persons with disabilities should be able to use accessible hotlines, reach trusted family and caregivers and have persons who check on them to ensure their safety.

During COVID-19, persons with disabilities face discrimination and barriers to access information, education and services.

Persons with disabilities have the same rights to SRHR on an equal basis as others during COVID-19.
